

Happy birthday to UEMS!

This is very special week for all our UEMS colleagues. 60 years ago, 20th of July the UEMS was founded! We as European Junior Doctors wish to express our sincere gratitude for all UEMS community for their absolutely amazing work and commitment over the last 6 decades shaping the medicine in Europe.

We all share pride and joy to work together with such a successful, ever growing organization and create history together. Our cooperation between junior doctors and our teachers across the Europe opened unique opportunity to develop and promote the highest quality medical education. Only working together shoulder to shoulder with all our EMOs we are able to face and solve our challenges related with postgraduate training.

We are looking forward to even greater achievements in the future!
